

BRICS countries' climate ambition in debate in the Brazil Climate Action Hub

In the midst of a challenging economic and political context full of uncertainties, there is an urgent need to reflect on the implications of the situation on the climate agenda. South Africa, Brazil, China, India and Russia have great relevance in tackling climate change and their role are central to the implementation of the Paris Agreement and to advance more ambitious agenda to face the great challenge climate crisis imposes on us. The Socio-Environmental Platform of BRICS Policy Center in partnership with Instituto Clima e Sociedade (iCS) and FASE invites all to the panel "Climate ambition of the BRICS countries", where we will show a preview of the study of the same name and will bring civil society and academia representatives from the BRICS countries to a roundtable about the group's role in the global climate governance, as well to evaluate how the BRICS countries' response to the climate crisis. To join the panel we will have Maureen Santos, coordinator of Socio-Environmental Platform and FASE, Romy Chevallier, senior researcher at South African Institute of International Affairs (SAIIA), and Utkarsh Patel (remote participation), associate fellow at Centre for Social and Economic Progress (CSEP). The roundtable will be moderated by Alice Amorim, coordinator of Philanthropy for Climate Lead Project at WINGS.

The event will be held on November 10th at 10 AM (Egypt time) at Brazil Climate Action Hub.
